After you gain proficiency and experience, you can consider adding some of the second-level approaches shown below in blue. For instance, many testing tools for mobile platforms provide frameworks for you to write custom scripts for testing. Having some experience with traditional DAST tools will allow you to write better test scripts. Likewise, if you have experience with all the classes of tools at the base of the pyramid, you will be better positioned to negotiate the terms and features of an ASTaaS contract.
